

Driving A New World of Communications

Tata Communications is a truly global communications provider with operations, infrastructure and partnerships across established and emerging markets.

Here are five examples of how Tata Communications empowers service providers and enterprises to tap into a new world of global commerce and collaboration.

World's largest subsea cable network, and the first wholly-owned fibre ring around the world

Over 15 terabits of international bandwidth lit capacity

World's largest international wholesale voice carrier

1 Million square feet of data centre and colocation space over 42 locations, integrated to a tier 1 backbone

Largest global network of public Telepresence rooms and widest reaching Telepresence network, with 75% of the world's installed Telepresence rooms connected to our Global Meeting Exchange™
